

About Me

Introduction

My name is Alex Ridgeley, and this is my portfolio. Or, at least, an early version of it. I'm currently a student at Keyin College with a lot to learn about Software & Web Development. Treat this page as an example of the things I've learned so far. It will also serve as a nice reminder of how far I've come when we look back at this later!

This is me, though not yet. It will be.

History

My name is Alex Ridgeley, and this is my portfolio. Or, at least, an early version of it. I'm currently a student at Keyin College with a lot to learn about Software & Web Development. Treat this page as an example of the things I've learned so far. It will also serve as a nice reminder of how far I've come when we look back at this later!
